- ◆ **WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER.**
- ◆ **ATTENTION! COUPER LE COURANT AU FUSIBLE OU UN DISJONCTEUR.**

MOUNTING THE FIXTURE (Fig.1)

1. Shut off the power at the circuit breaker box. Remove old fixture and all hardware from Junction Box.
2. Carefully unpack your new fixture and lay out all the parts on a clear area. Take care not to lose any small parts necessary for installation.
3. Attach the mounting screw part way into the side hole of the single bar, then lock it securely with hex nut until becoming.
4. Attach the single bar to the Junction Box with the two Box screws as shown. **The side of the single bar marked "GND" must face out.** The junction box is not included.
5. While holding the lamp(A) towards the ceiling, connect the electrical wires as Shown in Fig.2, making sure that all wire nuts are secured. You may have to wrap the connections with electrical tape. If your outlet has a ground wire (green or bare copper), connect the fixture ground wire to it. Otherwise connect fixture's ground wire directly to the Mounting strap with the green screw provided. After wires are connected, tuck them carefully inside the Junction Box.
6. Attach the lamp(A) onto the junction box, aligning screws on single bar with mounting holes in canopy and lock it securely with the ball nuts (B). Raise the pipe thread(C) into the bottom coupling of the lamp(A), screw it with the hex nut until tight. Raise the steel shim(D)/glass(E)/plastic shim(F) and steel shim(G) onto the end of pipe thread, lock them securely with the hex nut(H). Raise the cover(I) to the bottom of glass and lock it securely with the finial(J).
7. Install the light bulbs(not included) in accordance with the fixture's specifications. **NOTE: DO NOT EXCEED THE SPECIFIED WATTAGE!**

Your installation is now complete. Return power to the junction box and test the fixture.
